

INTRODUCTION

Gorki E. Encarnacion M.

From Dominican Republic.

Study

- Electronic Engineer.
- Master of Electronic Communications.
- Postgraduate in pedagogy for university Education.
- Plan for the future: Study for a doctorate.

Job

- Professor of Electronic Engineering at the University UNAPEC.
- Director of Technology and Telecommunications, Dominican Electric Transmission Company (ETED).

Why am I in Japan?

- Because I and a small team of teachers and students want to design and build the first CubetSat of the Dominican Republic.
- But we must first learn to use a cansat.
- In addition, this project would probably be my base to start my PhD studies in the field of engineering.

Posibles missions

- After learning Cansat begin our CubeSat project:
- Study the effects of Saharan dust crossing the Atlantic Ocean to our country, or
- Study the effects of pollution two power generators to mineral coal being built in the country.
